## Elevated Design. Soaring Speed.

Like a concept car, the LaCie Chromé defines the future for its class. A trophy for tech connoisseurs, it fuses forward-thinking technology with a startling, visionary design from Neil Poulton. As timeless as it is ahead of its time.

### Really Fast for the Real World
To squeeze the most out of the USB 3.1 Gen 2 potential, the LaCie Chromé features a pair of 500 GB M.2 SATA SSDs in RAID 0. Working together, these components deliver speeds of up to 940 MB/s[1] for serious bandwidth-intensive applications.

### USB 3.1 Gen 2: Not Just New. The Future.
This innovative new interface is more than just a doubling of USB 3.0 theoretical speeds to 10 Gb/s. Together, the new USB-C connector and USB 3.1 Gen 2 are a significant step forward for usability and compatibility.

### Designed for Performance
The LaCie Chromé is brilliantly engineered for the long term—from the enclosure to the internal components—to endure intensive storage tasks.

### Designed to Shine
"The LaCie Chromé is a concept reduced to its essence: a rectangle tilted onto its corner, melting into its base like quicksilver." – Neil Poulton, industrial designer
